

STEELS ACTIVE ON CURB, ALSO COPPERS

Midvale Reaches 78 5-8, the Highest Price on Present Movement.

MAGMA UP, THEN DOWN

Oil Stocks Are Higher, as Are Chevrolet and Submarine Boat.

Steel and copper shares were the features yesterday in a strong and active curb market. The coppers made gains at the start, but reacted sharply and sold off from a fraction to 7 points. Magma up sold to 69, a new high record, but closed at 62, 7 points off from the high of the day, and compared with 65 1/2, the close on Friday. Butte Copper and Zinc sold off fractionally. Cerro de Pasco sold at 48, the highest this year, and reacted 2 points at the close.

Midvale Steel went to 78 1/2, the highest on this movement, and Transue-Williams to 44 1/2, a net improvement of 1 1/2 points. United Alloys Steel was fractionally higher. Submarine Boat sold off 1 point on report that it had received large orders for submarines from the United States Government, and an order for trawlers from the British Government. The Lake Torpedo Boat was firmer in the early part of the day, but sold off fractionally later.

The paper stocks were slightly easier, with heavy trading reported. Chevrolet Motors was 4 points higher than Thursday's close, but the other motor shares remained practically unchanged. Oil shares were higher, especially Sinclair, which sold as high as 58 during the day, compared with a closing of 54 1/2 on Friday. The other oils were fractionally higher.

Bonds were active and higher. Cerro de Pasco gained 3 points net and Metropolitan Petroleum 6 1/2 points. Foreign bonds were unchanged. Sales and quotations:

An Unusual Investment and Speculative Opportunity.

SILVER KING of Arizona

Far famed as a Silver Mine, this wondrous property, in the seventies, produced around \$15,000,000 in Bonanza Ores from a developed area of less than 15,000 square feet.

Large quantities of high grade Copper were encountered during development, but left in the Mine as being then unprofitable to ship.

Evidence of the rich Copper values is found on the dumps which now comprise around 100,000 tons of very profitable Ores.

The property, consisting of 100 acres, contains one of the best defined vein systems in Arizona; with all indications that as depth is attained COPPER will predominate as with its neighbor Magna (the old Silver Queen) of similar history.

The Silver King, shut down thirty years ago for reasons having no bearing on its value, is at the present time being equipped with the latest machinery to reopen and develop the property on a large scale, together with an oil distillation plant for treating the drosses and extensive tonnage of medium grade Ores known to have been left in the Mine. The above machinery and plant have been delivered to the property, and are now being installed.

The Stock is Listed on the New York Curb.
